U. S. Patent and Trademark Office PTO-326 (Rev. 9-97)

Part of Paper No. 20

Art Unit: 1617

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 21-26, 28-32, 35, 36 are rejected under 35 U.S.C. 103(a) as being

unpatentable over Sorrentino in view of Lin et al.

Sorrentino et al teach a liquid composition comprising antitussive (abstract). Up to 75% of a co solvent such as ethanol is disclosed (column 4 lines 14-25).

Antioxidants such as BHT and BHA are specified (column 4 lines 49-50).

Lin et al teach the equivalence of TBHQ to BHT and BHA as antioxidants substitute THR for BHT (column 3 line 7 column 4 line 2).

It would have been obvious to one of ordinary skill to or BHA in the composition of Sorrentino et al for its beneficial effect as an antioxidant in view of the teaching of its equivalence to BHT and BHA as taught in Lin et al. As to the claimed amount of antioxidant. Lin et al teaches a suitable amount (Table 1B).

Claims 21-26, 28-33, 35, 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 93/00072 (WO '072) in view of Lin et al.

WO '072 teaches a composition comprising an 1-40% of a pharmaceutical active 20-40% PEG and 1-50% of a monohydric alcohol (page 4 lines 14-26). Analgesics are disclosed (page 8 line 35). Antioxidants are specified (page 13 line 35).

Lin et al teach TBHQ as a conventional antioxidant excipient (column 3 line 59 column 4 line 5). A suitable amount is specified (Table 1B).

Art Unit: 1617

It would have been obvious to one of ordinary skill to add TBHA to the composition of WO '072 for its beneficial effect as a conventional antioxidant excepient in view of Lin et al.

The disclosure is objected to because of the following informalities: On page 8-second full paragraph, applicants specify sodium thiosulphate and thiourea. As having a reduction potential about equal to or greater than 0.114 v. However, Wells, cited in the same paragraph, indicates that thiourea has a reduction potential of only -.029V and sodium thiosulphate has a reduction potential of only -0.050V (see p. 272 Table 5.7).

Appropriate correction is required.

Claim 33 is objected to because of the following informalities: See the above objection to the spec. Appropriate correction is required.

No claims allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward Webman whose telephone number is (703) 308-4432. The examiner can normally be reached on Monday to Friday 9 Am 5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, S. Padmanabhan can be reached on (703) 305-1877. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3592 for regular communications and (703) 305-3592 for After Final communications.

Application/Control Number: 09/467,333

Art Unit: 1617

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-1235.
